Art Unit: 2622

DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-67 provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-67 of copending Application No. 09/575,187. This is a <u>provisional</u> double patenting rejection since the conflicting claims have not in fact been patented. Claims 1-67 of the instant application correspond to claims 1-67 of 09/575,187 application.

Other Prior Art Cited

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dymetman et al. (US patent 6,330,976) discloses marking medium area with encoded identifier for producing action.

Back et al. (US patent 6,655,586) discloses system and method that detects a page identification using embedded identification tags.

Application/Control Number: 09/693,301

Art Unit: 2622

Damera-Venkata et al. (US patent application publication 2003/0112471) discloses generating graphical bar codes by halftoning with embedded graphical encoding.

Hilton et al. (US patent application publication 2004/0075869) discloses document printed with graphical symbols which encode information.

Contact Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to (Iraj) Alan Rahimi whose telephone number is 703-306-3473. The examiner can normally be reached on Mon.-Fri. 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L Coles can be reached on 703-305-4712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
